

UČNI NAČRT PREDMETA / COURSE SYLLABUS	
Predmet:	Intelektualna lastnina v informacijski družbi
Course title:	Intellectual property in information society

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Informacijska družba, doktorski študijski program tretje stopnje	-	Prvi	Prvi
Information Society, third cycle Doctoral Study Programme	-	First	First

Vrsta predmeta / Course type	Izbirni/ Optional
Univerzitetna koda predmeta / University course code:	1-ID-DR-IP-ILID-2020-07-31

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS
10	10	20	/	/	410	15

Nosilec predmeta / Lecturer:	doc. dr. Dolores Modic
------------------------------	------------------------

Jeziki / Languages:	Predavanja / Lectures:	Slovenski / Slovenian, Angleški / English
	Vaje / Tutorial:	Slovenski / Slovenian, Angleški / English

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites:
Ni posebnih pogojev	No special prerequisites.

Vsebina:	Content (Syllabus outline):
<p>SPLOŠNI DEL</p> <p>Teorije intelektualne lastnine Naravno pravo; utilitarne in ekonomske teorije; teorije menedžmenta; inovacijske teorije; distributivna in družbena pravičnost</p> <p>Pravice intelektualne lastnine Patenti (računalniški patenti); znamke; modeli; avtorske pravice; poslovne skrivnosti; druge pravice intelektualne lastnine</p>	<p>GENERAL PART</p> <p>Intellectual property theories The Natural Rights Perspective; The Personhood Perspective; Utilitarian/Economic Theories; Innovation Theories; Distributive and Social Justice</p> <p>Intellectual property rights Patents (software patents), Trademarks, Designs, Copyrights, Trade secrets, Other rights</p>

Inovacijske politike in prenos tehnologij

Intelektualna lastnina kot javno dobro

Mehanizmi; ekonomske teorije stroškov in koristi patentov; odprto inoviranje

Menedžment intelektualne lastnine v digitalni dobi

Inovacijski potencial pravic intelektualne lastnine; IP menedžment kot proces; strateški menedžment (pravic) intelektualne lastnine; združevanje patentov (patentne goščave, patentni bazeni)

POSEBNI DEL

Konkurenca, intelektualna lastnina in standardi

Standardni esencialni patenti (SEP); SEPi v IT; standardizacijske organizacije; FRAND pogoji

Patentna informatika, blockchain in pametne pogodbe

Merjenje inovacij; Intelektualna lastnina in big data razdvoumljanje in drugi problemi; novi formati (npr. T.i. 'Povezani podatki' kot metoda objave strukturiranih podatkov z uporabo standardnih spletnih tehnologij)

Innovation policies and technology transfer

Intellectual Property as a Public Interest

Mechanism; Economic Theories of Costs and Benefits of Patents; Open innovation

Intellectual property (rights) management in the digital age

Innovation potential of IPR; IP management as a process, Strategizing IP; Patent thicket, patent pools

SPECIAL FOCI

Competition, Intellectual Property and Standard Setting

Standard-essential patents (SEP); SEPs in IT; Standard setting organizations; FRAND terms

Patent informatics, blockchain and smart contracts

Measuring innovation; IP and big data; disambiguation and other common problems of patent infomatics, new formats (e.g. LOD as a method of publishing structured data using standard web technologies)

Cilji in kompetence:

Učna enota prispeva k razvoju naslednjih splošnih kompetenc:

- sposobnost identificiranja danega raziskovalnega problema, njegove analize ter možnih rešitev
- ustvarjanje novega znanja, ki pomeni relevanten prispevek k razvoju znanosti
- sposobnost oblikovanja in implementacije izvirnih znanstvenih rešitev danih družbenih problemov
- sposobnost obvladanja standardnih metod, postopkov in procesov raziskovalnega dela na različnih znanstvenih področjih – na preseku inovacijskih, menedžerskih in informacijskih znanosti

in predmetno-specifičnih kompetenc:

- sposobnost samostojnega znanstvenega dela na področju intelektualne lastnine
- sposobnost aplikacije metod patentne informatike na dani problem

Objectives and competences:

Learning unit contributes to the development of the following general competences:

- the ability to identify, analyze and construct solution for a given research problem
- the creation of new knowledge and contribution to the development of science
- the ability to design and implement novel scientific solutions for focal social problems
- mastery of standard methods, approaches and processes of scientific research in various scientific fields – in the intersection of innovation, management and information sciences

and subject-specific competences:

- *the ability to conduct independent scientific work in the area of intellectual property*
- *the capability to apply patent informatics methodologist to a given research problem*

Predvideni študijski rezultati:

Znanje in razumevanje:

Študent/študentka:

- demonstrira poznavanje ključnih pojmov in teorije intelektualne lastnine
- demonstrira sposobnost samostojnega in neodvisnega raziskovalnega dela na področju študij intelektualne lastnine
- demonstrira sposobnost prezentacije svojih raziskovalnih rezultatov na znanstvenih srečanjih in v znanstvenih publikacijah - vključujuč napisati znanstveni članek na temo intelektualne lastnine v digitalni dobi
- izkaže sposobnost pridobiti, procesirati in uporabiti podatke povezane z intelektualno lastnino.

Intended learning outcomes:

Knowledge and understanding:

The student:

- demonstrates knowledge of basic intellectual property concepts and theories
- demonstrates the ability of individual and independent research work in the field of intellectual property studies
- demonstrates the ability of presenting the acquired research results in scientific meetings and publications – including being able to write a scientific article on the selected topics at the intellectual property in the digital era
- gains the ability to collect, process and use data connected to intellectual property.

Metode poučevanja in učenja:

- Predavanja z aktivno udeležbo študentov za splošni del.
- Seminar za posebni del.
- Vaje za pregled raziskovalnega dela na predmetnem področju in predstavitev dela s konkretnimi podatki intelektualne lastnine.
- Individualno delo študentov; samostojni študij znanstvene in strokovne literature in izdelava raziskovalne naloge.

Learning and teaching methods:

- Lectures with active participation of students for the general part.
- Seminar for the special part.
- Tutorial for overview of research work and demonstration of work with intellectual property data.
- Individual work of students; independent study of scientific and professional literature, and the completion of the written research assignment.

Delež (v %) /

Weight (in %)

Načini ocenjevanja:**Assessment:**

Način (pisni izpit, ustno izpraševanje, naloge, projekt):

- Raziskovalna naloga v obliki znanstvenega članka

Type (examination, oral, coursework, project):

- Research paper in the format of a scientific article
