Temeljni literatura in viri / Readings:

- Nelson B., Phillips A. and Steuart C.: Guide To Computer Forensics and Investigations, 6th ed., 2018, Cengage.
- Carvey H.: Windows Registry Forensics: Advanced Digital Forensic Analysis of the Windows Registry 2nd Edition, 2016, Syngress.
- Årnes A. (Editor): Digital Forensics, 1st Edition, 2017, Wiley.

Cilji in kompetence:

Učna enota prispeva k razvoju naslednjih splošnih in predmetno specifičnih kompetenc:

- uporaba metodoloških orodij, tj. izvajanje, koordiniranje in organiziranje raziskav, uporaba raznih raziskovalnih metod in tehnik ter ocenitev njihove uporabnosti;
- zmožnost za prepoznavanje in izkoriščanje priložnosti, ki se ponujajo v delovnem in družbenem okolju (ki se izkazujejo kot podjetniški duh in aktivno državljanstvo);
- poznavanje in razumevanje interakcij med informacijsko komunikacijsko tehnologijo in sodobno družbo;
- poglobljeno razumevanje in kritično razmišlanje o zmožnostih in omejitvah informacijsko komunikacijskih tehnologij;
- poznavanje varnostnih vidikov elektronskega poslovanja;
- poznavanje konceptov in metodologij za analizo velikih količin podatkov.

Objectives and competences:

The instructional unit contributes to the development of the following general and subject-specific competences:

- use of methodological tools, i.e. implementation, coordination and organisation of research, use of various research methods and techniques and to evaluate their usefulness;
- the ability to recognise and take advantage of the opportunities, arising in work and social environment (and shown as the entrepreneurial spirit and active citizenship);
- knowledge and understanding of interactions between the information and communication technology and the contemporary society in-depth understanding and critical thinking regarding the possibilities and limitations of information and communication technologies;
- knowledge of the security aspects of e – business;
- knowledge of the concepts and methodologies for the analysis of large amounts of data.

Predvideni študijski rezultati:

Znanje in razumevanje:

- poiskati in ohraniti digitalne dokaze
- samostojna izvedba osnovne forenzične analize živega sistema
- samostojna izvedba kriminalistično-tehnične analize post-mortem sistemov
- samostojna izvedba forenzične analize mobilnih in PDA naprav
- izvedba analize malware-a
- izvedba ocene orodij za izvajanje računalniške forenzike
- predložitev in predstavitev poročila o spremljanju poslovanja

Intended learning outcomes:

Knowledge and understanding:

- locate and preserve digital evidence
- independent implementation of basic forensic analysis of living systems
- independent implementation of forensic analysis of post-mortem systems
- independent implementation of forensic analysis of mobile and PDA devices
- analyzing a malware
- performance assessment tools for implementation of computer forensics
- submission and presentation of a monitoring operations report

Metode poučevanja in učenja:

- predavanja z aktivno udeležbo študentov (razlaga, diskusija, vprašanja, primeri, reševanje primerov)
- vaje in laboratorijske vaje
- individualne in skupinske konzultacije (diskusija, dodatna razlaga, obravnava specifičnih vprašanj)

Learning and teaching methods:

- lectures with active participation of students (explanation, discussion, questions, examples, problem solving)
- exercises and lab work
- individual and group consultations (discussion, additional explanation, consideration of specific issues)

Načini ocenjevanja:Delež (v %) /
Weight (in %)**Assessment:**

Način (pisni izpit, ustno izpraševanje, naloge, projekt):

- pisni izpit
- seminarska naloga s poročili seminarskega dela in eksperimentalnih vaj ter predstavitev naloge

50 %

50 %

Type (examination, oral, coursework, project):

- written exam
- seminar work
