#### **Temeljni literatura in viri / Readings:**

- Banks, J., Carson, J. S., Nelson, B. L. & Nicol, D. M. (2009). *Discrete-Event System Simulation* (5<sup>th</sup> ed.). Prentice Hall.
- Borschchev A. (2013). *The Big Book of Simulation Modeling. Multimethod Modeling with AnyLogic 6*. AnyLogic North America.
- Sterman, J. D. (2000). *Business Dynamics: Systems Thinking and Modeling for a Complex World*. Irwin/McGraw-Hill.
- Law, A. (2014). *Simulation Modeling and Analysis* (5th ed.). McGraw-Hill.
- Kljajić, M. (1994). *Teorija sistemov*. Kranj: Moderna organizacija.
- Atanasićević-Kunc, M., Karba, R. & Zupančič, B. (2016). *Modeliranje in simulacija*. Založba FE.

#### **Cilji in kompetence:**

##### **Cilji:**

- seznaniti slušatelje s področjem uporabe dogodkovne simulacije in sistemskih dinamik pri reševanju organizacijskih problemov
- spoznati metode in tehnike modeliranja po principih dogodkovne simulacije in sistemskih dinamik
- obvladati kvantitativni pristop k izgradnji dogodkovnih modelov in modelov sistemskih dinamik

#### **Objectives and competences:**

##### **Objectives:**

- the main objective of the course is to introduce the application of discrete simulation and system dynamics at solving of the organizational problems
- understand the methods and techniques of modeling by the principles of discrete event simulation and system dynamics

- obravnavati osnove simulacijskih jezikov
- osvojiti postopke priprave eksperimenta in interpretacijo rezultatov
- izvedba celovitega projekta s področja dogodkovne simulacije in sistemske dinamike na akademskem primeru

*Učna enota prispeva k razvoju naslednjih splošnih in predmetno-specifičnih kompetenc:*

*Splošne kompetence:*

- poznavanje pomena kakovosti in prizadevanje za kakovost strokovnega dela skozi avtonomnost, samoiniciativnost, (samo)kritičnost, (samo)refleksivnost in (samo)evalviranje v strokovnem delu
- prepoznavanje in ocenitev aktualnih in nastajajočih tehnologij ter ocenitev njihove uporabnosti za reševanje potreb uporabnikov
- usposobljenost za samoučenje s ciljem obvladovanja najnovejših relevantnih spletnih in mobilnih tehnologij
- sposobnost varnega in namenskega koriščenja najzahtevnejših spletnih storitev
- zmožnost za prepoznavanje in izkorščanje priložnosti, ki jih ponuja spletna tehnologija

*Predmetnospecifične kompetence:*

- poznavanje in obvladanje simulacijskih metod in orodij, v domeni zveznih kakor tudi dogodkovnih modelov
- celovito načrtovanje in obvladovanje dogodkovnih in zveznih procesov
- izgradnja dogodkovnih simulacijskih modelov
- izgradnja modelov sistemske dinamike
- povezovanje simulacijskih modelov s podatkovnimi bazami in produkcijskimi informacijskimi sistemi
- harmonizacija delovnih procesov
- odprava ozkih gril v delovnih procesih
- analiza strukture in odziva sistema s pomočjo sistemske dinamike

- learn the quantitative approach to the discrete event models building and system dynamics models
- learn the basics of simulation languages
- study the experimental design approaches and interpretation of the results
- conduct of the complete project in the field of discrete event simulation and system dynamics in an academic case

*The instructional unit contributes to the development of the following general and subject-specific competences:*

*General competences:*

- familiarity with the importance of quality, striving to maintain the quality of professional work through practicing autonomous behaviour, showing initiative, as well as through (self-) criticism, (self-)reflection and (self-) evaluation
- identification and evaluation of current and emerging technologies, and assessment of their usability in terms of fulfilling user requirements
- ability to self-educate with the aim to master relevant state-of-the-art web and mobile technologies
- ability to safely and purposefully use the most complex web services
- Ability to recognize and seize opportunities offered by the web technology

*Subject-specific competences:*

- knowledge and ability to use simulation methods and tools, both discrete and continuous
- complete design and control of discrete and continuous processes
- building of discrete event simulation models
- building of system dynamics models
- connection of the simulation models with databases and production information systems
- harmonization of production processes
- elimination of bottle-necks in production processes

#### Predvideni študijski rezultati:

Znanje in razumevanje:

Študent/študentka pridobi znanja za:

- kvantitativno modeliranje organizacijskih problemov na področju proizvodnje, logistike in sistemov storitve
- analizo vhodnih podatkov, priprava in statistična obdelava
- definicijo kriterijev in dinamično testiranje hipoteze pri izboru rešitve
- optimizacija procesov z uporabo simulacijskih orodij

#### Intended learning outcomes:

Knowledge and understanding:

The student has the knowledge of:

- quantitative modeling of organizational problems in manufacturing, logistics, and service systems
- input data analysis, preparation and statistical processing
- definition of criterions and dynamical hypothesis testing at the solution selection
- process optimization using simulation tools

#### Metode poučevanja in učenja:

- predavanja z aktivno udeležbo študentov (razlaga, diskusija, vprašanja, primeri, reševanje problemov)
- laboratorijske vaje (uporaba simulacijskih orodij)
- individualne in skupinske konzultacije (diskusija, dodatna razlaga, obravnavanje specifičnih vprašanj)

#### Learning and teaching methods:

- lectures with active students' involvement (explanation, discussion, questions, examples, problem solving)
- laboratory work (usage of simulation tools)
- individual and group consultations (discussions, supplementary explanations, treatment of specific questions)

Delež (v %) /

Weight (in %)

#### Assessment:

|  |    |   |
|--|----|---|
| Način (pisni izpit, ustno izpraševanje, naloge, projekt):  | 50 | Type (examination, oral, coursework, project):  |
| <ul style="list-style-type: none"> <li>pisni izpit</li> <li>empirična seminarska naloga s poročili eksperimentalnih vaj ter predstavitev naloge</li> </ul> | 50 | <ul style="list-style-type: none"> <li>written examination</li> <li>empirical student assignment with the reports from experimental exercises together with the presentation of the assignment</li> </ul> |
